

# INTRODUCTION TO PERFECT MONEY

# What is perfect money?

**Perfect Money** was created as an electronic payment system for non-cash payments on the Internet. This network was established in 2007. On a legal basis, Perfect Money Corporation is registered in Panama. Despite the fact that the system was originally created as a payment tool for instant and secure settlements in the business environment and between private users, it is also used for money laundering

# Perfect Money Review and Possibilities

- Transfer of money between users
- Receiving payments on your site
- Payment for goods and services on the Internet
- Purchasing of bitcoin, gold, US dollars and euro
- Issuing and receiving loans within the system
- Receiving additional income from participating in a partnership program.

# Types of accounts

- Equivalent to the US dollar;
- Equivalent to Euro;
- Equivalent to gold;
- Equivalent to Bitcoin.

All types of accounts can be exchanged in the user's account at the market rate.

# Advantages and Disadvantages of Perfect Money

- The payment system interface is simple,
- The site is not overloaded with unnecessary details.
- The platform can boast an availability of 22 languages (from English to Urdu).
- One of the main competitive advantages of Perfect Money is low tariffs.
- The fee for the internal transfer of funds is only 0.5% (for a verified account).
- Instant transfer of money between system users;
- Presence of many exchange offices for the payment and withdrawal of money;
- Absence of limits for the implementation of financial transactions;
- Calculation of interest on the balance of funds (4% per annum);
- Functioning of referral program.

# Main Drawbacks

An essential disadvantage of the payment system is irreversibility of operations. If you make an erroneous payment or in case of fraud, a refund is not possible. In addition, users often have difficulties with the following issues:

- limited choice of currencies;
- high fee for restoring access to the account when the password is lost.

# Individual User Status

- Normal – such a status is given to all the new system users and does not impose any restrictions.
- Premium - this status is assigned to a user after 1 year or reaching certain achievements on the turnover of funds. This is the type of account with privileged features, which include a priority relationship when performing all operations for input and output of funds. The client has a right to make application for his status promotion.

# Perfect Money Security

There are 3 main ways used by the network to provide you with a safe usage of this system. All this is done to avoid hacking and stealing of your personal data and money.

Management of all security settings is conducted from the user account.

- User authentication This time you are sent an e-mail with PIN confirmation.
- SMS authorization This service helps to connect the user's account with his mobile phone number. Perfect Money sends you a confirmation code. This way it prevents illegal breaking into your personal account and hacking.
- Code card You are provided with code graphic image on the card. To confirm the transaction, the system sends you a request for you to enter this code from the card.
